General Assembly Notes

1. Clean all mating surfaces prior to installation using the cleaning pad (sold separately).

2. Apply a very thin layer of anti-oxidizing paste (sold separately) to all mating surfaces prior to installation.

3. All M6 Thread Forming Screws are to be fastened using a 7mm socket wrench and an installation torque of 35 in.-lbs.

4. All 1/4-20 Bolts are to be fastened using a 7/16" socket wrench and an installation torque of 7 Ft.-lbs.
