

Pneumatic Hand Tool Operator - 901510

Description

This versatile device was designed to be used with any of our ratcheting or spring-retracted crimpers & strippers.

Features

- Fully adjustable force & speed control on tool closure
- Maintains 3" (76mm) max stroke dual-control cylinder
- "U"-shaped nylon rollers to better grip tool handles
- Fits tools from 5" - 12" (127-305 mm)
- Uses quick push-lock type hose receptacles
- OSHA compliant
- Requires 120 PSI air supply using standard .25" couplers
- Dual-action foot control
- Tool holder module
- Air filter/pressure regulator with gauge
- Mounting base
- Flow/speed control
- Color-coded air tubing included
- Wrench included

Advantages

- Great low cost alternative to automatic crimping, stripping & cutting machines
- Eliminates operator fatigue
- 10 times faster than manual crimping
- Portable & light weight with multifunction operations
- Small bench footprint
