- MIS
 - Black (600Vac max 1 to 12A)

Description:

KAZ is a non-fuse actuator (not a fuse) for use in parallel with a 50 amp or greater fuse to provide indication a fuse has opened by opening at 10 or more amps. The KAZ can also be applied in a 1-, 2- or 3-pole block with miniature signaling switches to provide remote status indication.

MIS fuses are non time-delay pin indicating supplemental fuses used to provide a visual indication of an open fuse condition.

Features:

KAZ (not a fuse)

- Connects in parallel with fuses having a rating of 50 amps or more
- Opens at 10A or more
- Use with Bussmann series signal blocks to actuate a miniature switch that closes a signal circuit when the KAZ pin indicator ejects upon opening
- Gives a direct visual indication of an open fuse by the ejected, spring actuated pin
- UL Listed as "fuse accessory"
- Mounts in Bussman series signal blocks 2778 (1-pole), 2837 (2-pole) and 2838 (3-pole)

MIS (non time-delay fuse)

- Gives a direct visual indication of an open fuse by the ejected, spring actuated pin
- Can be used in circuits of 600Vac or less
- 200kA Interrupting rating

Typical applications

KAZ

- Large shunt-trip fused switches
- Fuse-protected circuits rated 50 amps or more with shunt-trip devices

MIS

- 480V Control circuits
- PLC Circuits
