

Accessories for Millenium 3

→ Millenium power supply

- With a switch mode power supply, regulated and protected against overloads and short-circuits, these new power supply units are easily integrated in switchboards and enclosures.
- The potentiometer can be used to set the output voltage between 100 and 120% (24 V $\overline{=}$ versions) to compensate for any voltage drops on the line.
- The LED continuously signals the presence of voltage at the output and, when flashing, triggering of the self-protection.
- Broad range of supply voltage 85 V \rightarrow 264 V \sim .
