Description

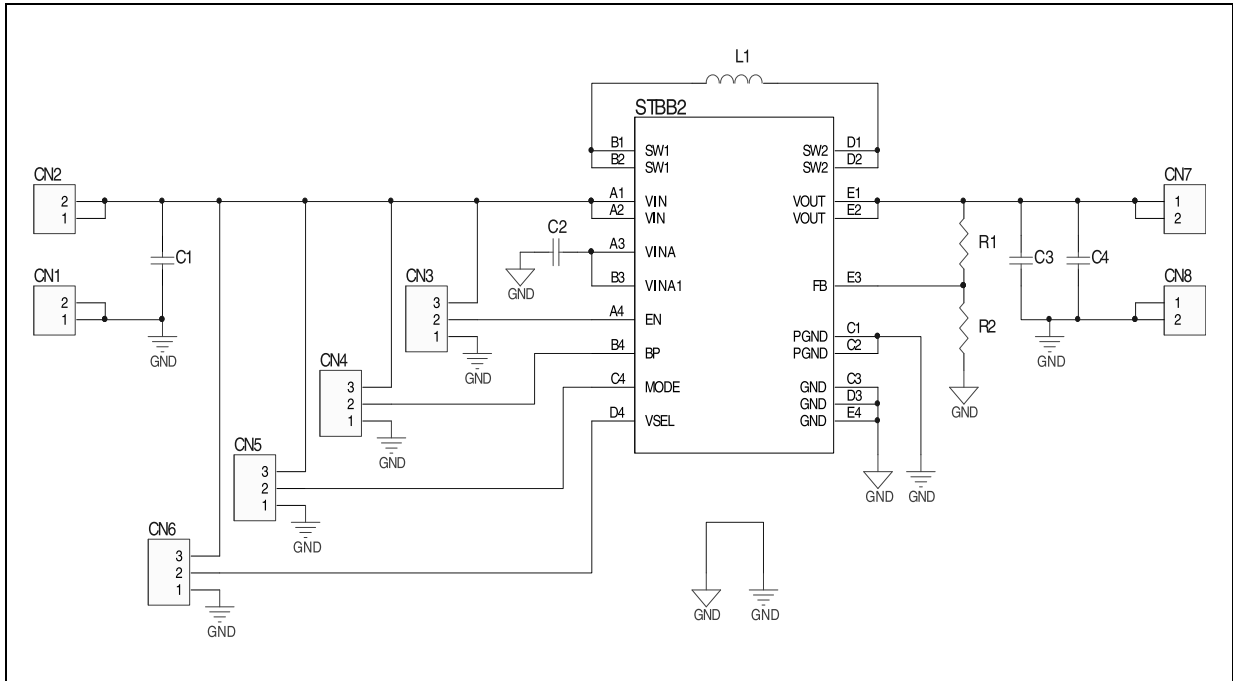

The STEVAL-ISA109V2 is designed to aid in the evaluation of the STBB2, a high efficiency buck-boost DC-DC converter capable of providing regulated output voltages in the range of 1.2 V to 5.5 V with an input voltage between 2.3 V and 5.5 V.

The board comes with the adjustable version of the STBB2 pre-mounted, with the output voltage set to 3.3 V. For this version, the V_{SEL} pin must be connected to V_{IN} .

The board can also demonstrate the performance of the fixed version of the STBB2, by replacing R_1 with a 0 Ω resistor and disconnecting R_2 .
