CY8CKIT-019 PSoC® Shield Adapter

Labels on diagram:
- User Switches
- Power LED
- Arduino™ Compatible I/O Header (J3)
- Arduino™ Compatible I/O Header (J4)
- Prototyping Connector (J9)
- User LEDs
- Thermistor
- Arduino™ Compatible I/O Header (J12)
- PSoC 5LP Header (J8)
- Reset Switch
- Power Jumper
- PSoC Expansion Board Kit Selectors
- Arduino™ Compatible I/O Header (J2)
- Potentiometer
- Arduino™ Compatible I/O Header (J1)
- PSoC Expansion Board Kit Adapter Header (J10)

PSoC Shield Adapter Features:

- 1 Potentiometer
- 1 Thermistor
- 2 Switches
- 1 Reset Switch
- 4 LEDs
- 6 Jumper Wires

CY8CKIT-019 PSoC Shield Adapter

The CY8CKIT-019 is intended to be used with a number of Cypress development and evaluation kits.

1. Download the Blinking LED example project from web page and unzip it: www.cypress.com/go/CY8CKIT-019
2. Connect the CY8CKIT-019 PSoC Shield Adapter to the CY8CKIT-042 PSoC 4 Pioneer Board.

3. Connect the USB cable from the PC to the CY8CKIT-042.
4. Connect a jumper wire from the prototyping connector pin 1 (LED1) to P0.4 (on J4).
5. Launch PSoC Programmer from the Start menu.
   - Go to Start > All Programs > Cypress > PSoC programmer
   Using the 'File Load' button, navigate to the Hex File downloaded from the web page and select the 'Blinking LED.hex' file.
6. Click the 'Program' button on PSoC Programmer. After successful programming, LED1 blinks.
